## DISCLAIMER

This software is distributed "as is." The author hereby disclaims all warranties relating to this software, whether express or implied, including without limitation any implied warranties of merchantability or fitness for a particular purpose. The author will not be liable for any special, incidental, consequential, indirect or similar damages due to loss of data or any other reason, even if advised of the possibility of such damages. The user of this software bears all risk as to its quality and performance.

## SOFTWARE PRODUCT LICENSE AGREEMENT

This Object Library package has a single user license and thus may be used on one computer at a time. For each additional computer, you must purchase an additional package or a site license. You are authorized to make archival copies of the software product for the sole purpose of backing up your software and protecting your investment from loss or damage. No other copies of the software may be produced for share or sale to third parties. Please respect and support third party development.

Be sure to register this software by either sending back the enclosed registration card, e-mail, or phone. This will enable you to receive notices about future updates and releases, plus provide us with ideas for better libraries.

DIMENSIONS Design Group, Inc. is committed to bring the highest quality to electronic media. Ideas and comments are always welcomed.

ArchiCAD and PlotMaker are registered trademarks of Graphisoft.

Macintosh and QuickTime are registered trademarks of Apple Computer, Inc..

MS-DOS and Windows are registered trademarks of Microsoft Corporation.

## Introduction

**SmartParts 3D Objects Collection** adds that extra touch of realism to ArchiCAD models. Included in this set are flexible, parametric wall opening objects that can be used for most common applications. To use you must install on your computer and register to get Code Key.

## Easy Installation Instructions

1. Insert the disc into your CD-ROM drive.
2. Double-click the D3 SmartParts icon to display the contents.
3. Double-click the Installer icon.
4. Follow the on-screen instructions.

---

## Setting up Active Libraries

### Active Libraries

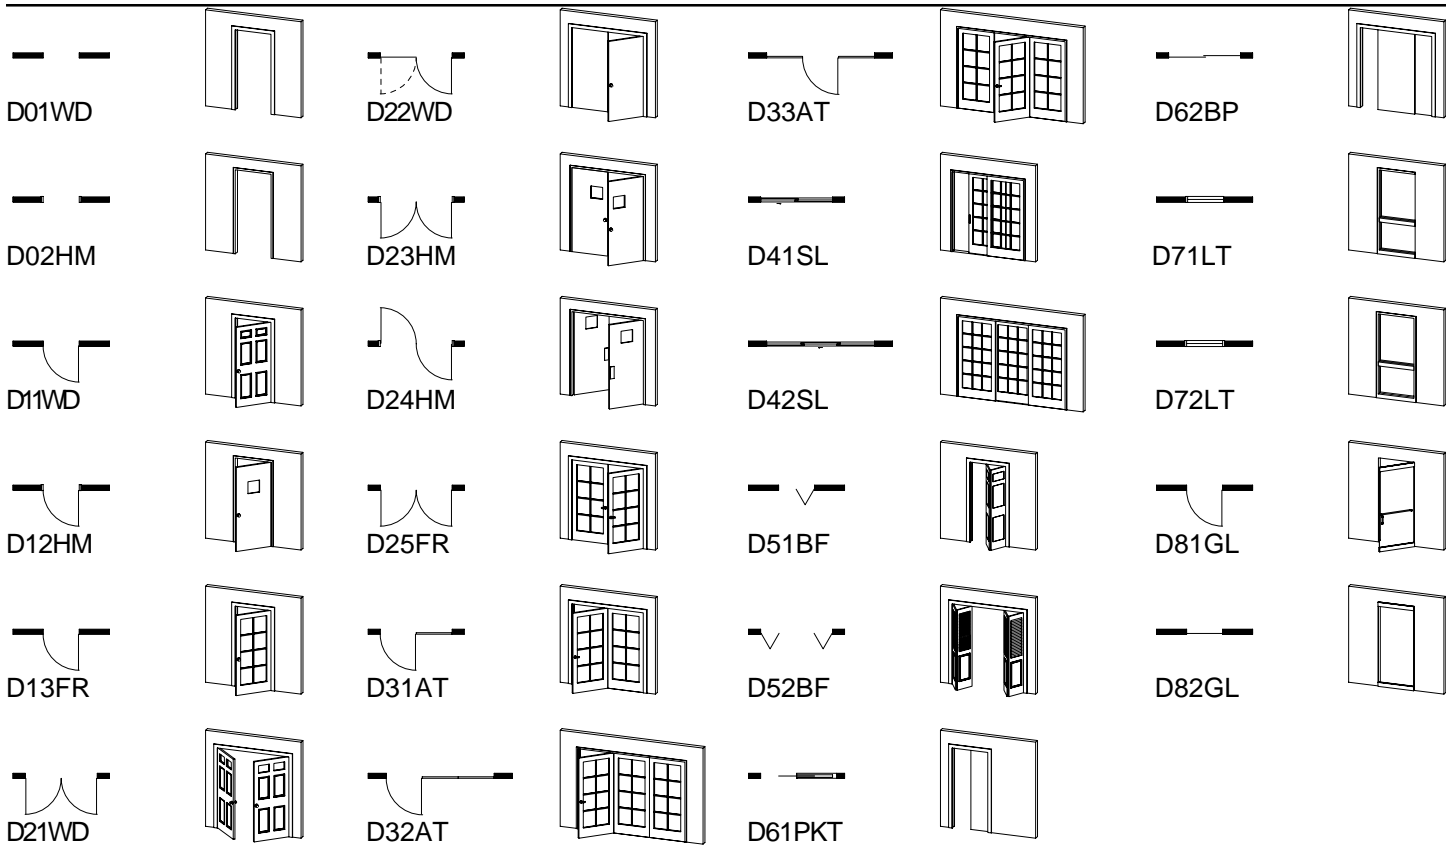

To use the libraries, move the folders to the location of the **Active Library** (by default **ArchiCAD Library**).

TIP - Create a separate folder as your special add-on and custom objects. This way if you leave the ArchiCAD Library intact, upgrading is easier. Use the menu **File/Load Libraries** to add your special folder to your projects. If you make your own unique custom objects for a project, a project folder for each project can reduce the loading time.

To ensure that the libraries get properly loaded, make sure that ArchiCAD is not currently running.

## Upgrading and Archiving

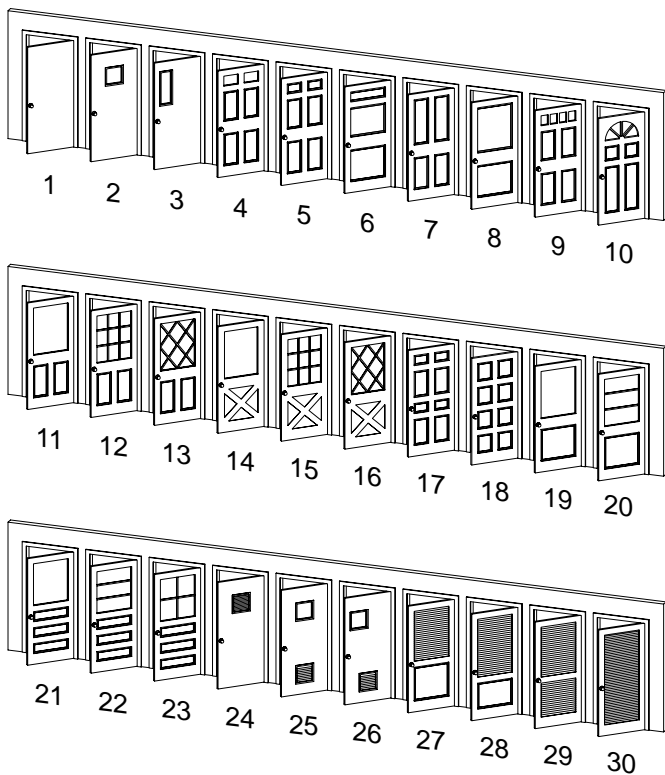

If you are using a previous version of SmartParts, it is a good idea to make an **Archive** file of it to store the exact set of objects and names associated to that particular project. Otherwise since some of the objects have had their parameters switched to coordinate with all other objects, you may find abnormalities in parts. If this happens select the object and change the appropriate parameters.
